CALL FOR SUBMISSIONS
AGEP SCIENCE TODAY BULLETIN

The AGEP Editorial Board is calling for submissions for the 2015 AGEP Science Today Bulletin. The goal of this bulletin is to highlight exciting, empirical research in progress by AGEP members and to provide a venue to share this research with AGEP, MSU, and non-academic communities. AGEP students from all fields (STEM and SBE) are welcomed to submit a research brief. Research briefs should be at least 500 words and not exceed 750 words. This submission should serve as a brief synthesis of your research, must appeal to a broad and interdisciplinary audience, and must be written using common language (no jargon). The final publication will be available online and limited copies will be available in print.

Important Dates

- Write-in October 28 2014
- **Submission Deadline** November 15 2014
- Reviewer feedback to authors January 20 2015
- Revision write-In January 28 2015
- **Final Submission Deadline** March 5 2015

Submission Guidelines:

- All briefs should include a submission form that provides contact information of primary investigator and authors
- The title of the research project and authors names (in order of authorship) should appear at the top of your research brief
- Briefs must emailed directly to: msuagepbulletin@gmail.com

Your brief should:

- Be written to a broad audience (language should appeal to non-researchers/scientist as well as individuals from diverse fields)
- Provide a research synthesis that integrates a large body of research
- Be approved by your mentor if you are not using independent data
- Have prior verification by all necessary parties to insure that your brief does not violate any publication/copyright concerns (e.g. submissions based on work previous published in other venues)
**Guidelines for Brief Submission**

Introduction:
- Title, Authors, Department
- Key Words: List at least 2 (no more than 6) key words that are associated with your work (i.e. stem cells, memory, discourse, education)
- Objective: State your research question and/or hypotheses
- Relevant literature and/or theoretical framework(s)

Methods:
- Describe the problem statement.
- Discuss the methods used in the study (i.e. content analysis or regression).
- Be sure to include where you are in your research and what projects you have remaining (if your work is not yet completed).

Analysis and Results:
- Briefly describe your analysis and the associated results.
- If you have yet to complete your analysis, please discuss your expected results.
- You should address any limitations within your work.

Future Work:
- Include where you would like to go with your work (i.e. next steps).

Broader Implications:
- The impact your research have across disciplines

In Summary, Your Brief Must Include:
- The objective of the work
- The main research question
- The methods and analysis used to test the research question
- The results, including limitations, the significance, and possible avenues for future research
- The significance, advances to previous work/knowledge, and avenues for future research
- At least 2 sources and no more than 5
