Medical and Health Sciences Foundation Fellowships

Grant Title
Brookdale Foundation Leadership in Aging Fellowships

Description
The Leadership in Aging Fellowship provides two years of support to junior academics to focus on a project that will help establish them in an area of aging research. The fellowship is open to a broad range of disciplines including, but not limited to, medical, biological and basic sciences, nursing, social sciences, the arts and humanities. The award is a two-year grant paid to the candidate's sponsoring institution in support of the candidate’s research project. The grant amount of up to $125,000 each year is intended to cover 75% of the fellow's time, base salary and fringe benefits. The award could also be used to include the support of a graduate assistant if necessary as long as the total amount does not exceed $125,000.

Requirements
The fellowship is open to all professionals in the field of aging. Candidates must have: (1) leadership potential; (2) an ongoing commitment to a career in aging; (3) a mentor (or mentors); (4) and, a willingness to commit at least 75% of his or her time for career development during each of the two years of the fellowship.

Samples
(2008) Kate de Medeiros, Ph.D. - Johns Hopkins University School of Medicine; Jennifer Hagerty Lingler, PhD, MA, FNP - University of Pittsburgh Schools of Nursing and Medicine; Teresita M Hogan MD, FACEP - Department of Emergency Medicine at the University of Illinois Chicago; Brie A. Williams, MD, MS - Division of Geriatrics at the University of California, San Francisco.

Amount
up to $125,000 each year

Grant Title
HHMI Gilliam Fellowships for Advanced Study

Description
The Fellowships provide full support for up to five years of study toward a Ph.D. for outstanding students who are from groups underrepresented in the sciences or from disadvantaged backgrounds. Gilliam fellows attend the university of their choice and work alongside distinguished scientists. Chosen for their academic excellence and scientific potential, they will become the leaders of a new generation of biomedical researchers. The Fellowship is available up to 5 years at $44,000 per year.
**Requirements**
Must be: past participants in the HHMI Exceptional Research Opportunities Program (EXROP); graduating seniors or recent baccalaureate recipients (within two years) who have completed no more than one year of Ph.D. training. Former EXROP students pursuing an M.D./Ph.D. degree may apply, but the fellowship supports only the Ph.D. portion of the studies. There is no citizenship requirement.

**Amount**
$44,000

**Deadline**
Oct 6

**Deadline Satisfied**
Receipt of application satisfies deadline date requirement.

HHMI Grants and Fellowships Programs

Description
The institute administers a grants program that focuses on improving science education from preschool through postdoctoral training, enhancing the science literacy of the general public, and supporting the research of biomedical scientists in selected foreign countries. Currently, grants are administered through five programs: an international program that supports biomedical scientists outside the United States and provides funding for selected courses and workshops; a precollege science-education program that offers grants for educational activities to science museums, botanical and zoological gardens, etc.; a biomedical-research program that supports medical schools and research organizations; a graduate science-education program that provides fellowships for graduate students, medical students, and physicians, and supports special courses; and a biological-sciences education program that awards grants to selected undergraduate institutions.

Samples
United Way of New York City (NY)--for the September 11th Fund, established to support emergency-assistance to organizations and other nonprofit health and human-service groups providing disaster-relief services to victims of the terrorist attacks in New York, Pennsylvania, and Washington, $50,000.

Grant Title
MGFA Student Fellowships

Description
These fellowships are awarded annually to current medical students or graduate students interested in the scientific basis of myasthenia gravis or related neuromuscular conditions, serving both to further scientific inquiries into the nature of these disorders and to encourage more research. The stipend is up to $5,000. See the Foundation's website for application form and guidelines.
**Requirements**
The fellowships are awarded to current medical students or graduate students. Briefly describe, in abstract form, the question that you propose to study, its association to myasthenia gravis or related neuromuscular conditions, and how you will approach the project. Applicants and sponsoring institutions must comply with policies governing the protection of human subjects, the humane care of laboratory animals and the inclusion of minorities in study populations.

**Amount**
$5,000

Grant Title
Advocate HealthCare Post Graduate Administrative Fellowship

Description
The program is open to recent graduates from programs in Healthcare Administration or Business Administration, and is designed to provide its fellows with an educational working environment that enables them to use their analytical, project management and communication skills in team-based setting. Under the supervision of senior leaders, fellows complete projects in operational and/or strategic areas. Project assignments are adapted to the individual's needs and interests. The postgraduate fellowship is a one-year program designed to enables the graduate to develop leadership skills and management skills. Fellows are given the opportunity for exposure across Advocate's eight hospitals, three physician practice organizations, home health care agency and corporate offices (Chicago area).

Requirements
In order to be considered, the following must be submitted no later than November 1, the year previous to entry in to the program: (1) Personal statement of interest from explaining qualifications and career objectives; (2) Statement of community involvement; (3) A current resume; (4) Letters of recommendation from applicant's program director and at least one other professional recommendation; and, (5) Copy of unofficial undergraduate transcripts and most recent graduate school transcripts.

Deadline
Nov 1

PDF Summer Fellowships
Description
PDF's Summer Fellowship Program is used to support students – from advanced undergraduates to graduate and medical students – in their pursuit of Parkinson's-related summer research projects. The goal of the Summer Fellowship is to cultivate an early interest in Fellows into the cause(s) and possible treatments for Parkinson's disease. Fellows work under the close supervision of a sponsor who is an expert in the Parkinson's community and oversees the project. Typically, summer fellowships are offered for 10 weeks of laboratory work with an award of $3,000. The application period for Summer Student Fellowships will open on Monday, November 2, apply by 11:59 PM ET on Friday, January 15.

Requirements
Undergraduate students, graduate students and medical students are all eligible for summer fellowships. Each applicant must identify a mentor, with whom he or she will conduct the proposed project.

Amount
$3,000

Deadline
Jan 15

Deadline Satisfied
Receipt of application satisfies deadline date requirement.

Grant Title
American Psychiatric Association/Wyeth Pharmaceuticals M.D./Ph.D. Psychiatric Research Fellowships

Description
The Fellowship provides one year of funding and is designed to support two post-graduate psychiatry trainees with research experience, specifically to focus on research and personal scholarship. Minimal time will be devoted to teaching, patient care, consultation, or other duties. The protection of time for research should be assured by the department chairman.

Requirements
Individuals who have received their MD or DO and a PhD degree and who have completed residency training in general psychiatry or child psychiatry immediately prior to the time the fellowship commences are encouraged to apply. The Fellowship is designed for residents who: (a) have demonstrated significant research potential, (b) have had research training (i.e. as part of their work towards their PhD), and (c) are not already an established investigators. These individuals must also be members of the APA.

Amount
$45,000

Deadline
Oct 14

Grant Title
American Psychiatric Association/Bristol-Myers Squibb Fellowships in Public Psychiatry

Description
This important collaborative venture between the American Psychiatric Association and the Bristol-Myers Squibb Company provides for the selection of ten residents in psychiatry, based on recommendations from their Departments and evidence of a track record of commitment to and accomplishment in public psychiatry. The purposes of the APA/Bristol-Myers Squibb Fellowship are twofold: (1) to heighten psychiatric residents' awareness of the many activities of psychiatry in the public sector and of the career opportunities in this work, and (2) to provide experiences which will contribute to the professional development of those residents who will play leadership roles within the public sector in future years.

Requirements
Nomination Procedure and Eligibility Criteria: One outstanding resident who has a substantial interest in any area of public sector psychiatry and a significant potential for a leadership role in such work may be nominated by a psychiatric residency training program that is accredited by the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada; submission of a nomination represents an explicit commitment by the residency program to permit the candidate, if selected, time off to attend APA meetings in their entirety during the fellowship term, as well as the candidate's willingness to do so; Psychiatric residents who will be in the PG-3 year of training during the fellowship term are eligible to participate in the program; residents who will be in their PG-4 year will also be considered if they are in a 5-year psychiatric training program; nominee must be an APA member or in the process of becoming a member. To be considered, the following must be submitted: completed application form (submitted electronically or via mail); two-page essay; letter of nomination from the Residency Training Director or Chair, Department of Psychiatry.

Restrictions
Residents who have received (or are scheduled to receive) other APA fellowships or comparable outside fellowships (e.g., Ginsberg, Laughlin) are not eligible. Those residents who currently serve on APA's Committee of Residents and Fellows are not eligible for the fellowship.

Deadline
Mar 31
Deadline Satisfied
Receipt of application satisfies deadline date requirement.

ASPET Summer Undergraduate Research Fellowships (SURF)

Description
The purpose of the Fellowship program is to introduce undergraduate students to pharmacology research in order to heighten interest in science as a career, with an emphasis on pharmacology graduate training to increase the number of young scientists entering the research discipline of pharmacology. A group of at least five ASPET Regular members from one institution may wish to apply for support of up to $9,000 for an undergraduate fellowship program, to include up to five students stipends. Students are to receive at least a $2,800 stipend for a minimum of ten weeks participation. It is anticipated that the request for funding will include matching funds of at least $5,000 from local resources. Awards are normally made for three (3) years.

Restrictions
No indirect costs will be provided. All funds shall be used for student stipends/wages only.
Amount
$2,800 per student; $9,000 per group

Deadline
Mar 1; Oct 1

Alzheimer's Association New Investigator Research Grants

Description
The purpose of this program is to provide new investigators with funding that will allow them to develop preliminary or pilot data, to test procedures, and develop hypotheses which will then underpin the preparation of research grant applications to
NIH, NSF, and other funding agencies and groups, including the Alzheimer's Association. All applications submitted to the program must focus on a question or questions in interventions for Alzheimer's disease to be considered responsive to the program announcement. Thirty awards will be made under this program. Letters of Intent (LOIs) must be received by December 1, with completed applications due by January 8.

Requirements
Public, private, domestic and foreign research laboratories, medical centers and hospitals, and universities are eligible to apply. Eligibility is restricted to investigators who have less than 10 years of research experience, including postdoctoral fellowships or residencies, after receipt of the doctoral degree. Applications from graduate and doctoral students for research projects, which will be used for the thesis or dissertation, will be accepted.

Samples
Valentina Echeverria Moran, Ph.D., Bay Pines Foundation, Bay Pines, Florida--Molecular Mechanisms Underlying the Neuroprotective Actions of Cotinine, $100,000 over two years (2008); Grace Stutzmann, Ph.D., Rosalind Franklin University of Medicine and Science, North Chicago, Illinois--Neuronal Ca2+ Dysregulation as a Pathogenic Factor in Alzheimer's Disease, $100,000 over two years (2008).

Amount
$100,000 maximum for two years; $60,000 maximum per year

Grant Title
Tulane University PCF Social Entrepreneurship Fellowships

Description
The Tulane University Center for Public Service, in partnership with the Prostate Cancer Foundation, announces an exciting opportunity for graduating seniors in the field of social entrepreneurship. Applications are being excepted for a full time two-year, paid fellowship with the Prostate Cancer Foundation located in Santa Monica, California. The Prostate Cancer Foundation fellowship in social entrepreneurship is a great way for students to build upon their public service experience at Tulane, to network in the field of public policy and cancer awareness, and gain valuable work experience following graduation in a major foundation with global reach.
Requirements
The Fellowship requires candidates to be comfortable working in public policy and well-versed in the foundations of economic development and economic policy; and will be able to engage effectively in negotiations among public to private partnerships as well as private to private, and foundation to foundation relationships. Relevant college-level coursework required includes a minimum of two biology courses that will have provided a basic knowledge of modern biology, as well as courses in economic and/or public policy. Interest and experience in public health would be an asset. Superior writing and critical thinking skills are absolutely required; candidates must demonstrate an ability to write, edit and publish relevant materials of the highest quality. Fluency in Microsoft Word, Excel and PowerPoint is essential. Applicants should submit a resume (including a list of relevant coursework), transcript, one letter of recommendation specific to the nature of the fellowship, and a personal statement answering a list of questions (see website for details). Send completed application packet directly to the Center for Public Services, attention: Vincent Ilustre, Executive Director.

Amount
$32,000 - $35,000 range

Deadline
May 5

ASM/CCID Fellowships:

**Description**
The program is sponsored by the American Society for Microbiology (ASM) and the Coordinating Center for Infectious Diseases (CCID), formerly known as the National Center for Infectious Diseases (NCID). The goal of ASM/CCID Fellowship is to support the development of new approaches, methodologies and knowledge in infectious disease prevention and control in areas within the public health mission of the CDC. The fellowship allows one to perform research in residence at the CCID which is headquartered at the Centers for Disease Control and Prevention (CDC) in Atlanta, GA. Eligible fields of study include: bacterial and Mycotic Diseases; viral and Rickettsial Infections; nosocomial Infections; HIV/AIDS; vector-borne Infectious Diseases; parasitic Diseases. The Fellowship provides an annual stipend (up to $42,188), health benefits (up to $3000 annually) for a maximum of 2 years, relocation benefits (up to $500), and (up to $2000 annually) for professional development for a maximum of 2 years.

**Requirements**
The program is intended for individuals who either earned their doctorate degree or completed a primary residency within three years of their proposed start date. Applicants may not have a faculty position or be enrolled in a graduate degree program during the fellowship. Considerations will be given to individuals with more experience if there are compelling reasons. Qualified applicants will receive consideration without regard to race, creed, color, age, sex, or national origin.

**Amount**
$41,000 - $42,000 range

NHLBI Individual Predoctoral Fellowships to Promote Diversity in Health-Related Research:

Description
This program encourages students from underrepresented racial and ethnic groups, individuals with disabilities, and individuals from disadvantaged backgrounds to seek graduate degrees in the biomedical and behavioral sciences to help increase the number of well-trained scientists from underrepresented groups. The fellowship provides up to 5 years of support for research training leading to the Ph.D. or equivalent research degree, the combined M.D./Ph.D. degree, or other combined degrees in the biomedical or behavioral sciences.

Requirements
At the time of appointment, students must be U.S. citizens, noncitizen nationals, or lawfully admitted to the U.S. for permanent residence. Individuals on temporary or student visas are not eligible. Individuals with disabilities, or from racial and ethnic groups, or individuals from disadvantaged backgrounds pursuing advanced degrees in the biomedical and behavioral sciences are eligible.

Christine Mirzayan Science and Technology Policy Graduate Fellowship
Program:

Description
The Christine Mirzayan Science & Technology Policy Graduate Fellowship Program of the National Academies is designed to engage graduate science, engineering, medical, veterinary, business, public policy, and law students in the analytical process that informs the creation of national policy-making with a science/technology element. As a result, students develop basic skills essential to working in the world of science policy.

Requirements
Applications for the fellowships are invited from graduate students through post-doctoral scholars in any physical, biological, or social science field or any field of engineering, medicine/health, or veterinary medicine as well as business, law, education, and other graduate and professional programs. Graduate students and postdoctoral scholars and those who have completed graduate studies or postdoctoral research within the last 5 years are eligible to apply.

Grant Title
PhRMA Foundation Pharmacology/Toxicology Pre Doctoral Fellowships:

Description
The program is designed for candidates who expect to complete the requirements for the Ph.D. in the fields of pharmacology or toxicology in two years or less from the time the fellowship begins. The award is made to the university on behalf of the fellow. The fellowship provides a stipend of $20,000 a year payable monthly for a minimum of one year and a maximum of two years. Of the $20,000 awarded annually, up to $500 a year may be used for incidentals directly associated with the thesis
research preparation (e.g., secretarial help, artwork, books, travel, etc.). Awards may be activated beginning January 1 or on the first day of any month thereafter, up to and including August 1. The second year of a fellowship is contingent upon certification by the thesis advisor that satisfactory progress is being achieved.

**Requirements**
The fellowship program of pre-doctoral support is designed to assist full-time, in-residence Ph.D. candidates in the fields of pharmacology or toxicology who are enrolled in USA schools of medicine, pharmacy, dentistry or veterinary medicine. The program supports full-time advanced students who will have completed the bulk of their pre-thesis requirements (at least two years of study) and are engaged in thesis research as Ph.D. Candidates by the time the award is activated. Students just starting in graduate school should not apply. In the field of pharmacology or toxicology, highest priority will be given to applications for research that attempts to integrate information on the mechanism of action of a drug or chemical at a molecular or cellular level with the drug's effects in the intact laboratory animal or human, encompassing the potential influences of biochemical, physiological or behavioral systems. The pharmacology/toxicology research and teaching mission of the unit awarding the degree must be apparent as a core mission component on their web site. Applications must be submitted by an accredited U.S. school, and all applicants must be U.S. citizens or permanent residents. The program assumes that the fellows will devote full-time (including summers) to their research. The PhRMA Foundation fellowship may not be used to supplement funds from other fellowships, traineeships or assistantships, unless necessary to make stipend levels compliant with institutional policy. The focus of the program is to assist in the predoctoral training of the candidate. It should not be viewed as a program to fund a research project.

**Restrictions**
A candidate enrolled in an M.D./Ph.D. program should not be taking required clinical course work or clerkships during the tenure of the fellowship. The foundation will accept only one application per academic institution. Exceptions may be considered for institutions with multiple campuses. Indirect costs are not provided to the institution and PhRMA Foundation grant funds may not be used for this purpose.

Grant Title
PhRMA Foundation Health Outcomes Pre-Doctoral Fellowships:

Description
To provide some assistance in this training sequence, the PhRMA Foundation program aims at supporting promising students during their thesis research. The program provides a stipend and funds to cover costs incidental to the training. Applications will be accepted for a minimum of one year and a maximum of two years. The program is designed for candidates who expect to complete the requirements for the Ph.D. in the field of health outcomes in two years or less from the time the fellowship begins. The program assumes that the fellows will devote full-time (including summers) to their research. The award is made to the university on behalf of the fellow. The fellowship provides a stipend of $20,000 a year payable
monthly for a minimum of one year and a maximum of two years. Of the $20,000 awarded annually, $500 a year may be used for incidentals directly associated with the thesis research preparation (e.g., secretarial help, artwork, books, travel, etc.). The second year of a fellowship is contingent upon certification by the thesis advisor that satisfactory progress is being achieved.

Requirements
The fellowship program of pre-doctoral support is designed to assist full-time, in-residence Ph.D. candidates in the fields of health outcomes who are enrolled in U.S. schools of medicine, pharmacy, dentistry or schools of public health. The program seeks to support advanced students who will have completed the bulk of their pre-thesis requirements (two years of study) and are starting their thesis research by the time the award is activated. Students just starting in graduate school should not apply. A candidate enrolled in an M.D./Ph.D. program should not be taking required clinical course work or clerkships during the tenure of the fellowship. Before an individual is eligible to apply for a PhRMA Foundation award, the applicant must first have a firm commitment from a U.S. university. Applications must be submitted by an accredited U.S. school, and all applicants must be U.S. citizens or permanent residents.

Restrictions
The fellowship may not be used as a supplement to funds from other fellowships, traineeships or assistantships. The focus of the program is to assist in the pre-doctoral training of the candidate. It should not be viewed as a program to fund a research project. An individual may not simultaneously hold or interrupt any other fellowship providing stipend support during the PhRMA Foundation fellowship.

Amount
$20,000

**Grant Title**  
PhRMA Foundation Informatics Pre Doctoral Fellowships:

**Description**  
The program is designed for candidates who expect to complete the requirements for the Ph.D. in the fields of informatics in two years or less from the time the fellowship begins. It aims at supporting promising students during their thesis research. The award is made to the university on behalf of the fellow. The fellowship provides a stipend of $20,000 a year payable monthly for a minimum of one year and a maximum of two years. Of the $20,000 awarded annually, up to $500 a year may be used for incidentals directly associated with the thesis research preparation (e.g., secretarial help, artwork, books, travel, etc.). Applications will be accepted for a minimum of one year and a maximum of two years. The program assumes that the fellows will devote full-time (including summers) to their research.

**Requirements**  
The fellowship program of pre doctoral support is designed to assist full-time, in-residence Ph.D. candidates in the fields of informatics who are enrolled in USA schools of medicine, pharmacy, dentistry or veterinary medicine. The program supports full-time advanced students who will have completed the bulk of their pre-
thesis requirements (at least two years of study) and are engaged in thesis research as Ph.D. Candidates by the time the award is activated. Students just starting in graduate school should not apply. Highest priority will be given to applications who support the goal of the Informatics Programs. The goal of the program is to promote the use of informatics in an integrative approach to the understanding of biological and disease processes. Informatics awards will support career development of scientists engaged in computational and experimental research to integrate cutting-edge information technology with advanced biological, chemical, and pharmacological sciences. Applications must be submitted by an accredited U.S. school, and all applicants must be U.S. citizens or permanent residents.

**Restrictions**
The fellowship may not be used to supplement funds from other fellowships, traineeships or assistantships, unless necessary to make stipend levels compliant with institutional policy. The focus of the program is to assist in the predoctoral training of the candidate. It should not be viewed as a program to fund a research project. Indirect costs are not provided to the institution and PhRMA Foundation grant funds may not be used for this purpose.

**Compton Foundation International Fellowships:**

**Description**
The goal of the Compton Foundation's International Fellowship Program is to contribute to the capacity of developing countries, especially in Central America and Sub-Saharan Africa, as well as Mexico, to improve policies and programs relating to Peace and Security, Population and Reproductive Health and Environment and Sustainable Development. The Foundation strives to accomplish this goal by supporting outstanding graduate students who are committed to careers in the program areas of interest to the Foundation within the developing world. Compton Fellows are chosen by selected university-based programs working in partnership with the Foundation.

Grant Title
**ACCP Infectious Diseases Research Fellowships:**

Description
The purpose of ACCP fellowships is to support the development of Clinical Scientists through postgraduate fellowship experiences, or through the support of graduate students who have at least completed their qualifying examinations. Research activities must relate directly to the stated areas of emphasis. Fellowships support a research training experience and not a clinical pharmacy residency program. A pharmacy fellowship is a directed, highly individualized postgraduate program designed to prepare the participant to become an independent researcher. Fellowships exist primarily to develop competency in the scientific research process. The ACCP Research Institute believes that clinical pharmacy fellowships should be at least two years in length, and will give strong preference to funding applications that describe a multi-year training program. This grant will provide the fellow's stipend for either the first, second, or third year. Preceptors will have the option to receive the fellowship's entire funding over one year, or half funding for each of two years.

Requirements
Preceptor: An ACCP Full Member at the time application is made. Fellowship applications submitted concurrently with an application for Full Membership will not be considered. Fellow: An ACCP Member, Associate Member, or applicant for member. If a graduate student, (a) preference will be given to supporting students who have received or are concurrently enrolled in a Pharm.D. degree program; and (b) the Fellow must at least have completed his/her qualifying examinations.
**Restrictions**
Ineligible applicants include: ACCP Board of Regent members; ACCP Research Institute Board of Trustee members; Grants and Fellowship Selection Committee members; preceptor of an ACCP Research Institute fellowship within the previous year.

**Amount**
$40,500

**Deadline**
Mar 23

**Deadline Satisfied**
Receipt of application satisfies deadline date requirement.

**ACCP Oncology Research Fellowships:**

**Description**
This fellowship, supported by a grant from sanofi-aventis, supports the development of Clinical Scientists in oncology through postgraduate fellowship experiences, or through the support of graduate students who have at least completed their qualifying examinations. Research activities must related to the stated area of emphasis. This grant provides the fellow's stipend of $38,000, travel support of $1,000, and personnel fringe benefits of $1,500.

**Requirements**
Preceptor: An ACCP Full Member at the time application is made. Fellowship applications submitted concurrently with an application for Full Membership will not be considered. Fellow: An ACCP Member, Associate Member, or applicant for member. If a graduate student, (a) preference will be given to supporting students who have received or are concurrently enrolled in a Pharm.D. degree program; and (b) the Fellow must at least have completed his/her qualifying examinations.

AAAAI / Schering Allergy/Immunology Fellowship of Excellence Training Awards

**Description**  
The Award will support the two years of training (MDs and DOs) for a fellow at an ACGME-accredited allergy/immunology training program who is a member of an underrepresented minority community, a graduate of a U.S. medical school certified in Internal Medicine or Pediatrics, and a U.S. citizen. The application must be received no later than April 1, and should be completed by the fellow who will start training July 1.

**Requirements**  
Receipt of the Award does not preclude the applicant from obtaining grant support from other sources

**Restrictions**  
Funds may not be used for institutional indirect costs

**Amount**  
$50,000 per year for two years
Deadline
Apr 1

Deadline Satisfied
Receipt of application satisfies deadline date requirement.

Grant Title
Paul and Daisy Soros Fellowships for New Americans

Description
The program offers support for graduate study by New Americans, individuals who hold Green Cards or who have been naturalized as US citizens or are children of two parents who are both naturalized citizens. The program offers maintenance and tuition grants for up to two years of graduate study in the United States. Fellows must have
shown potential in the fields for which they seek further education; the capacity for creativity, initiative, originality, and work; and the commitment to the values of the US Constitution and Bill of Rights. Applications are available from college academic advisors, the program's Web site, or by contacting the program directly.

**Requirements**
Applicants must have either the bachelor's degree or be in the final year of undergraduate study and must not be older than 30 years of age as of the listed application deadline.

**Samples**
2007: Eunice Cho, second-year JD student at Stanford Law School; Yahonnes Cleary, a second-year student at Yale Law School; Wei Lien Dang, PhD candidate in Physical Biology and Engineering at Harvard University; Mary Farag, MA candidate in Religion at Yale University; Shelli Farhadian, fourth year student at the Tri-Institutional MD/PhD program with Weill Cornell Medical College, Rockefeller University and Sloan Kettering Institute.

**Amount**
$20,000

Grant Title
FDHN Student Research Fellowships

Description
This program offers financial support for students to spend a minimum of 10 weeks performing research in digestive diseases or nutrition and is intended to stimulate interest in research careers in these areas. The work may take place at any time during the year. Up to 20 fellowships will be available for full-time research with a preceptor, who must be a faculty member who directs a research project in a gastroenterology-related area at an accredited North American institution. A complete financial statement and scientific progress report are required upon completion of the program. The AGA has recognized the need to attract and encourage minority individuals to enter and pursue gastroenterology research careers. In response to this concern, seven of the student research fellowship awards will be reserved for underrepresented minority students. For the purpose of this award, minorities have been defined as African American, Hispanic, Native American/Alaskan Native, and Pacific Islander.

Requirements
Candidates may be high school, undergraduate, medical, or graduate students (not yet engaged in thesis research) in accredited North American institutions. Women and minority students are strongly encouraged to apply. The preceptor must be a faculty member who directs a research project in a gastroenterology-related area at an accredited North American institution.

Restrictions
Candidates may not hold similar salary support from other agencies: e.g., American Liver Foundation, Crohn's and Colitis Foundation.
**Samples**

Grant Title
Judith Graham Pool Postdoctoral Research Fellowship in Hemophilia

Description
A limited number of fellowships are awarded through professional and graduate schools or research institutions. The Judith Graham Pool (JGP) program is designed to support research studies of high scientific merit and relevance to hemophilia. Permissible research topics include clinical or basic research on the biochemical, genetic, hematologic, orthopedic, psychiatric, or dental aspects of the hemophilias or von Willebrand disease. Other acceptable topics include rehabilitation, therapeutic modalities, psychosocial issues, or AIDS/HIV as they pertain to hemophilias or von Willebrand disease. Awards are made for a one- or two-year period, with the second-year renewal contingent upon demonstrated progress in the fellow's research project. The fellowships will be awarded for the period between July 1 of one year and June 30 of the next. Applications are available on the Web site.

Requirements
Applicants must be citizens or permanent residents of the United States who have completed doctoral training and must enter the JGP fellowship program from a doctoral, postdoctoral, internship, or residency training program.

Restrictions
Established investigators or faculty members are not eligible.

Amount
$42,000 per year

Deadline
Dec 1

Deadline Satisfied
Receipt of application satisfies deadline date requirement.
