Regeneron Pharmaceuticals and Keck Graduate Institute (KGI) invite outstanding researchers with a PhD in science or engineering to apply for the Corporate Postdoctoral Residency Program. This unique program leads to both corporate experience and a Postdoctoral Professional Masters (PPM) degree in Bioscience Management from Keck Graduate Institute.

This 24-month corporate experience and networking opportunity is unsurpassed for postdoctoral researchers interested in opportunities in the life sciences industry.

**THE PROGRAM SEQUENCE CONSISTS OF:**
- Spring enrollment at Keck Graduate Institute in the PPM; a 9-month accredited masters program that helps PhDs acquire the business and management skills needed to pursue either R&D or management careers within the life sciences industry.
- A paid summer internship at Regeneron in Tarrytown, New York.
- Upon completion of the PPM degree, the postdoctoral residents return to Regeneron, in New York, to participate in a 1-year residency program in one of the following groups: Regulatory, Program Management, or Process Development (placement is based on experience and fit).

**POSITIONS AVAILABLE:**
- KGI Corporate Postdoctoral Residency Program - Regulatory Associate
- KGI Corporate Postdoctoral Residency Program - Preclinical Manufacturing and Process Development
- KGI Corporate Postdoctoral Residency Program - Project Associate II
