This program provides graduate students the opportunity to put newly learned skills and knowledge to work with partner Belizean nonprofits. Working hand-in-hand with local organizations unveils real-life challenges and the opportunity to co-create sustainable solutions. Through this close collaboration, students will address individual nonprofit needs focused on three topics of sustainability including, financial sustainability, staff succession planning, and nonprofit strategic planning. Collaborative work includes contributing to board development initiatives, designing diversified funding strategies, and co-developing a succession planning toolkit while developing vital cross-cultural communication skills.

Highlights of the 2026 itinerary include:

1. Collaboration with nonprofit organizations
2. Visit with U.S. Embassy in Belize
3. Meeting with Peace Corps Belize
4. Cultural excursions (Xunantunich, San Ignacio, Blue Hole National Park, Mountain Pine Ridge Forest Reserve)
