Research Mentor Training

Based upon an internationally recognized evidence-based mentoring training curriculum, this workshop is designed to provide participants with some of the most important skills and ideas required for high-level mentoring of undergraduate or graduate students in a research environment. This will be an ideal, in-depth professional development experience for graduate students or postdocs who will be mentoring research assistants over the summer months. Graduate students and postdocs will have the opportunity to come learn about (and share) best practices in mentoring research assistants. Participants will have the opportunity to ask questions and share strategies about the most effective way to both provide students with an excellent learning experience and get their own work done.

Friday, April 6th, 2018
8:30-5:00pm

Developing Your Teaching (Philosophy) Statement: An Introduction

Over the course of your academic career you may be asked to write a “teaching statement” or “teaching philosophy statement”. In this workshop, participants will learn about the uses and formats teaching statements, and be given tools to begin writing a statement for academic job applications. This workshop has been developed for advanced doctoral students, graduate school teaching fellows (FAST, RCAH, IIT, LBC) and postdoctoral fellows.
