Based upon an internationally recognized evidence-based mentoring training curriculum, this workshop is designed to provide participants with some of the most important skills and ideas required for high-quality mentoring of undergraduate or graduate students in a research environment.

Are you mentoring others in research this summer? Do you want to talk about mentoring challenges and best-practices?

If so, please join us for this all-day workshop. Register at http://www.grad.msu.edu/events

Optimizing Research Mentoring Relationships with Your Graduate and Undergraduate Student Mentees

Friday, March 29, 2019
